FULL STACK ENGINEER

Full Stack Engineer with production experience building scalable **Node.js** and **TypeScript** backends, **RESTful API design**, and cloud-deployed systems on **AWS**. Skilled in **database optimization**, **Redis caching**, **event-driven architecture**, and **CI/CD** automation. Built and shipped a **Generative AI** pipeline using **Gemini** and **OpenAI** APIs that cut manual reporting time by **70%**. Delivered **99.9% uptime** and a **40%** reduction in database load in production.

TECHNICAL SKILLS

- Languages:** TypeScript, JavaScript, C++
- Backend & API Development:** Node.js, Express.js, RESTful API Design, Microservices, Event-Driven Architecture, Authentication & Authorization, Rate Limiting, WebSockets
- Databases & Caching:** PostgreSQL, MongoDB, Redis, Prisma ORM, TimescaleDB, Neon DB, Supabase, Database Optimization, Caching Strategies
- Generative AI:** LLM Applications, Prompt Engineering, AI Agents, Vision Models, LangChain, LangGraph, Fine-Tuning, Vector Databases, Claude AI, Gemini API, OpenAI API
- Frontend:** React.js, Next.js, Tailwind CSS, Socket.io
- Cloud & DevOps:** AWS EC2, Docker, Nginx, Load Balancing, CI/CD, GitHub Actions, PM2, SSL/TLS, Vercel, Railway
- Tools:** Git, GitHub, Cursor, Claude Code, Codex CLI, OpenCode, Gemini CLI, Razorpay

EXPERIENCE

- Full Stack Engineer**
Taurgo

Jan 2026 – Present
Remote – Cardiff, UK

 - Owned **DevOps** end-to-end: containerized services with **Docker**, deployed the frontend on **Vercel** with a CDN, and migrated infrastructure from **Hostinger** to **AWS EC2** with **Nginx load balancing**, SSL/TLS, and PM2 – cutting hosting costs and achieving **99.9% uptime**
 - Built backend features including a **notification system** and event-driven APIs; added **Redis caching** and optimized **PostgreSQL** schemas with targeted indexing – reducing DB load by **40%** under peak traffic
 - Developed a **Generative AI** reporting pipeline using **Gemini** and **OpenAI** APIs for image analysis and prompt-based report generation; improved **Puppeteer PDF generation** speed – cutting manual reporting time by **70%**
 - Participated in code reviews and architecture discussions with senior engineers, resolving security issues and correcting system flow – maintaining zero critical bugs in production
- Full Stack Engineer Intern**
SmallFare

Sep 2025 – Dec 2025
Hyderabad, India

 - Integrated the **organizer dashboard** and **onboarding flow** for EFOrganize, a live ticketing SaaS; fixed and improved the existing **Prisma** schema implementation
 - Implemented **authentication and authorization** flows and integrated **Cashfree** for document verification
 - Added **Redis TTL caching**, traffic-throttling policies, and **TimescaleDB** for time-series analytics; automated deployments with **GitHub Actions CI/CD**

EDUCATION

- IIMT University**
Bachelor of Technology, Computer Science Engineering – CGPA: 8.9

Jul 2022 – Jun 2026

PROJECTS

- ClaimWise UK**
Node.js, TypeScript, Next.js, PostgreSQL, Prisma, Redis, AWS EC2, Claude AI

[GitHub](#)

 - AI SaaS product using **Claude AI (LLM)** to identify unclaimed UK benefits across 40+ government schemes from a **£24.1B/year** pool; backend designed with **API rate limiting** and 3-tier freemium billing
 - Implemented auth with **refresh token rotation**, a 14-model **Prisma** schema, and PDF parsing with **Redis caching**; deployed on **AWS EC2** with Nginx, HTTPS, and automated **CI/CD**
- BookMyBus**
Node.js, TypeScript, Express.js, Socket.io, MongoDB, Redis, Docker, AWS

[GitHub](#)

 - Real-time ticketing platform with a distributed backend, GPS tracking, and dynamic seat locking via **WebSockets**; rate-limited APIs and payment integration; containerized with **Docker** on AWS behind Nginx load balancing
- DevSwap**
Node.js, TypeScript, Express.js, WebRTC, Socket.io, Redis, MongoDB, Gemini API, Docker

[GitHub](#)

 - Skill-exchange platform with an event-driven backend, **Redis-backed** matching, **WebRTC** video, synchronized code-editor sessions, and Socket.io chat; **Gemini API** generates lesson plans; containerized on AWS EC2
