SUMMARY

Full-stack MERN developer focused on building scalable, production-grade web applications and low-latency real-time systems. Experience designing backend architecture, optimizing APIs and databases, and deploying containerized services to AWS. Strong with real-time communications (WebSockets/Socket.io), caching (Redis), and building reliable CI/CD pipelines.

WORK EXPERIENCE

Full Stack Developer — Taurgo (Remote, Cardiff, Wales, UK) Jan 2026 – Present

- Developing and enhancing full-stack features for Taurgo’s AI-powered PropTech platform, including immersive 360° virtual tours and automated property reporting workflows.
- Designed and implemented scalable **REST APIs**, optimized database schemas, and improved response performance across core modules.
- Built and maintained client-side features using **React**, focusing on usability, responsiveness, and smooth UI interactions.
- Collaborating cross-functionally with engineering, product, and design teams to ship high-impact releases and contribute to roadmap discussions.

Full Stack Developer Intern (Team Lead) — SmallFare, Hyderabad Sept 2025 – Dec 2025

- Led a small development team during the internship, coordinating tasks, reviews, and delivery timelines.
- Improved backend efficiency for real-time ticketing by optimizing API routes and caching strategies.
- Implemented **Redis** caching and worked with **TimescaleDB** for time-series data handling.
- Built internal monitoring dashboards and supported Docker-based deployments with CI/CD automation.

PROJECTS

BookMyBus — Real-Time Bus Ticketing System [Live Link](#)

Real-time GPS tracking, dynamic seat selection, JWT authentication, payments and admin dashboard. Production deployment with **Nginx** load balancing, Dockerized services, and **AWS** for scalability. Implemented Socket.io workflows for live location and seat availability.

DevSwap — Developer Skill-Exchange Platform [Live Link](#)

MERN platform using Redis for skill matching, JWT auth, Socket.io chat and screen-share. Containerized with Docker and deployed on **AWS EC2** behind an Nginx reverse proxy.

Chatrr — Random Video Chat Platform [Live Link](#)

WebRTC + Socket.io signaling for peer-to-peer video, reconnection logic, dark mode UI and cross-device stability improvements.

SkillBridge — Freelance Marketplace [Live Link](#)

Marketplace with role-based auth, job bidding, real-time messaging and advanced search/filtering. Focus on efficient server-side workflows for smooth UX.

SKILLS

Frontend	React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS
Backend	Node.js, Express.js, NestJS , REST APIs, WebSockets, Socket.io, BullMQ, JWT
Database	MongoDB, PostgreSQL, NeonDB, Redis, TimescaleDB, Supabase
DevOps / Tools	Docker, Git, GitHub, Postman, Nginx, CI/CD, AWS, Vercel, Netlify
Programming	C, C++

EDUCATION

B.Tech in Computer Science, IIMT University 2022–2026
SGPA: 8.9/10
