SUMMARY

Full-stack MERN developer experienced in building scalable systems, real-time communication workflows, backend architecture, caching, API optimization, and cloud-based deployments. Strong in delivering reliable, production-ready engineering solutions.

WORK EXPERIENCE

Full Stack Developer Intern — SmallFare , Hyderabad

Sept 2025 – Present

- Improved backend API performance and stability for real-time system workflows.
- Developed internal dashboard modules used for operations, monitoring, and system visibility.
- Worked with **TimescaleDB** for time-series analytics and performance insights.
- Implemented Redis caching and session management, reducing load and accelerating responses.
- Resolved API integration issues across modules, improving communication reliability.
- Contributed to architectural discussions and deployment pipeline enhancements.

PROJECTS

BookMyBus — Real-Time Bus Ticketing System

[Live Link](#)

Real-time GPS tracking, dynamic seat selection, JWT authentication, payments, emergency alerts, and admin dashboard. Used **Nginx load balancing**, **Dockerized services**, and deployed on **AWS** for production stability and scalability. Built real-time communication workflows for location updates and seat availability.

DevSwap — Developer Skill-Exchange Platform

[Live Link](#)

MERN platform with Redis skill-matching, JWT auth, Socket.io chat, screen sharing, and AI session summaries. Containerized using **Docker**, deployed with **AWS EC2**, and served via **Nginx reverse proxy**. Optimized WebSocket connections for low-latency real-time communication.

Chatrr — Random Video Chat Platform

[Live Link](#)

WebRTC-based video chat app supporting random pairing, reconnection logic, dark mode UI, and Socket.io signaling. Focused on real-time peer-to-peer communication flows and connection stability across devices.

SkillBridge — Freelance Marketplace

[Live Link](#)

Marketplace with role-based authentication, job bidding system, real-time messaging, and advanced search/filtering. Implemented efficient backend workflows and optimized client-server communication for smooth user experience.

SKILLS

Frontend	React.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS
Backend	Node.js, Express.js, REST APIs, WebSockets, Socket.io, BullMQ, JWT
Database	MongoDB, PostgreSQL, NeonDB, Redis, TimescaleDB
DevOps / Tools	Docker, Git, GitHub, Postman, Nginx, CI/CD, AWS, Vercel, Netlify
Programming	C, C++

EDUCATION

B.Tech in Computer Science, IIMT University
SGPA: 8.9/10

2022–2026
