SUMMARY

A full-stack developer and Computer Science student experienced in building scalable web applications, integrating frontend and backend systems, and developing high-performance, real-time features.

WORK EXPERIENCE

Full Stack Developer Intern — SmallFare

Sept 2025 – Present

Contributed to both frontend and backend development to ensure seamless client-server integration. Validated API communication across modules, implemented missing backend features, and recommended ORM adoption for improved performance.

PROJECTS

DevSwap — Developer Skill-Exchange Platform

[Live Link](#)

Built a full-stack platform enabling developers to match and swap skills using Redis-based matching algorithms. Features secure JWT authentication, Socket.io real-time chat, screen sharing, and Gemini AI-powered session summaries.

BookMyBus — Bus Ticket Booking System

[Live Link](#)

Responsive MERN platform with JWT authentication, dynamic seat selection, payment gateway, and real-time bus tracking. Includes emergency contact system and admin dashboard for route and schedule management.

Chatrr — Random Video Chat Platform

[Live Link](#)

Real-time video and text chat app using WebRTC and Socket.io. Features random pairing, dark mode UI, and seamless connection switching

SkillBridge — Freelance Marketplace

[Live Link](#)

Full-stack freelance marketplace with role-based authentication, real-time chat, job bidding system, and advanced search filters.

SKILLS

Frontend	React.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS
Backend	Node.js, Express.js, RESTful APIs, WebSockets, Socket.io, Bull MQ, JWT Authentication, Prisma ORM
Database	MongoDB, PostgreSQL, Redis
DevOps / Tools	Docker, Git, GitHub, Postman, Nginx, CI/CD, AWS, Vercel, Netlify
Programming	C, C++

EDUCATION

2022 - 2026	Bachelor of Technology at IIMT University	(SGPA: 8.9/10.0)
2021	Class 12th CBSE	
2018	Class 10th CBSE
